

Important Messages From the Florida DFS and DFR

Attention FGFOA members, the following are important messages from the Florida Department of Financial Services and the Department of Revenue's Office of Tax Research.

1. The Florida Department of Financial Services would like to remind local government entities that F.S. 163.31801 was amended and effective beginning 7/1/2020. The Department of Financial Services is currently working on a form in the LOGER system for the local government entities to report the respective information on their **10/1/19-9/30/20** Annual Financial Reports. To see the changes, please click [here](#).
 2. The State's new official revenue estimates were adopted on 8/14/20 at the General Revenue Estimating Conference and the Department of Revenue's Office of Tax Research has updated county and municipal revenue estimates to reflect the new official state figures. However, the initial Communications Services Tax (CST) and Taxable Sales Reported by Transient Rental Facilities estimates, both published in late July, will not be updated. To see the estimates or for questions, please go to [County and Municipal Revenue Estimates](#).
